## INFORMATION PROFESSIONAL DEVELOPMENT

[Scholarly R&D: coping with cuts:](#) Even in the downturn, there are success stories for those who are prepared to show evidence of value.

[Journal Citation Reports 2008 – more titles, new metrics:](#) Register now for free web-based training to help keep you up to date and take advantage of new functionality in *Journal Citation Reports*.

[Metrics-based research evaluation:](#) The challenges in building robust research evaluation and management systems can be best overcome by the research management and librarian community working together.

### [Open standards and accurate author identification - join the debate:](#)

New Community Forums for *ResearcherID* include some lively exchanges around author identification.

### [InCites - charting research performance:](#)

Thomson Reuters Jim Pringle talks about *InCites*, the citation-based research analytics tool that enables you to evaluate and benchmark your institutional productivity.

## INTELLECTUAL PROPERTY

[A new set of rules for innovation:](#) Forward-thinking IP leaders need to establish their own change management initiative such that corporate strategy is shaped through a company's investments.

[Asian innovation takes hold in the US:](#) Our 2008 Global Innovation Study revealed that Asian innovation is taking hold in the US.

[Join our seminar in Tokyo:](#) Innovation crisis — how to evolve IP in your business strategy.

## PHARMACEUTICAL KNOWLEDGE

[Influenza A \(H1N1\) and the threat of pandemic:](#) Download our free disease briefing on influenza, and access further detailed sources of information.

[Building a benefit-risk framework for new medicines:](#) The CMR International Institute for Regulatory Science has made significant advances in outlining a common framework for the assessment of the benefits and risks of new medicines.

[HIV Pathogenesis - is a vaccine possible?:](#) Webcast by Françoise Barré-Sinoussi, winner of the 2008 Nobel Prize in Medicine, on the current and future state of HIV research.

[The problem with cancer:](#) Dr Jeffrey Ross talks about his research focusing on identifying breast and prostate cancer biomarkers—and whether cancer screening could do more harm than good in some cases.

[Can intelligent cuts in drug R&D ease the pain?:](#) When stock plunges, drug discovery budgets shrink. Survival is all about making the right go, no-go decisions as early as possible.

[Protecting a nation from drug disasters](#): Medical oncologist Professor Masanori Fukushima aims to translate Japan's highly regarded life sciences research into clinical practice for the benefit of practitioners and ultimately patients.

---

## SCIENTIFIC RESEARCH

[Swine influenza - lessons from history](#): With 110 years of coverage of international scholarly journals, *Web of Science* can identify highly valuable research relating to influenza.

[Race against time](#): Building on past research to contain H1N1.

[Thought leaders in the unthinkable](#): Science Watch examines highly cited research on bioterrorism over the last decade.

[Parasites - disease or delight?](#): Biologists have increasingly understood that removing parasites could drastically alter the infrastructure of our planet.
